AMERICAN VISIBLE NUMBERING MACHINES

Model 41—3 Movement Numbering Machine

\$18⁰⁰

654321

Facsimile Impression

CONSTRUCTION — Model 41 is fitted with three movements, and may be set so that it will number either consecutively, or in duplicate, or repeat. Changes from one movement to any other movement are quickly made by throwing the lever at the side of the front plate to the desired movement. When set at consecutive, the machine will advance one unit at each impression. The duplicate movement furnishes two impressions of each number while the repeat movement will continue the same number until changed.

STANDARD MACHINES are all made with 6 steel wheels and with figures same as impression shown.

Special figures other than those shown will be made to order only. See page 9.

SPECIAL MACHINES —Triplicate or quadruplicate movements may be substituted for the regular duplicate movement at an extra charge of \$2.00. Machines with 7 wheels or more, price see page 9.

PREFIX LETTER WHEELS will be furnished at an extra charge of \$3.00 engraved with any 9 characters or less. Suffix letter or fraction wheels, \$5.00 each. Each letter or fraction wheel reduces the number of figure wheels accordingly.

NUMBERING MACHINES

**Model 21—9 Movement
Numbering Machine**

\$20⁰⁰

654321

Facsimile Impression

CONSTRUCTION — This Model is practically the same in size and general construction as Model 41 except instead of having but three movements it has nine movements. This gives a range of automatic numbering to meet almost all requirements.

Standard Machines are all made with six steel wheels and style of figures as shown. Special figures will be made to order. See page 9.

Special Machines — Prefix letter wheels engraved with any nine characters or less can be obtained at an extra charge of \$3.00. Suffix letter wheels \$5.00 each. Each letter wheel reduces the figure wheels accordingly.

**Model 21—9 Movement Machine will
number as follows:**

Consecutive—1, 2, 3, 4, 5, 6, 7, 8, 9, 10, etc. to 1 million.
Repeat.

2 Times—1, 1—2, 2—3, 3—4, 4, etc. to 1 million.

3 " —1, 1, 1—2, 2, 2—3, 3, 3, etc. to 1 million.

4 " —1, 1, 1, 1—2, 2, 2, 2, etc. to 1 million.

5 " —1, 1, 1, 1, 1—2, 2, 2, 2, etc. to 1 million.

6 " —1, 1, 1, 1, 1, 1, etc. to 1 million.

10 " —1, 1, 1, 1, 1, 1, 1, 1, 1, 1, etc. to 1 million.

12 " —1, 1, 1, 1, 1, 1, 1, 1, 1, 1, 1, 1, etc. to 1 million.

and Repeat Indefinitely.

AMERICAN VISIBLE NUMBERING MACHINES

Model 71—Lever Operated **\$18⁰⁰**
Numbering Machine

654321

Facsimile Impression

CONSTRUCTION — This model is non-automatic, designed for repeating numbers an irregular number of times.

For example: It is often desired to number enclosures in letters or attachments to orders, giving the letter or the order a number and all the enclosures in the letter or attachments to the order the same number.

As these enclosures or attachments vary in number and the first letter may have five enclosures, the next ten, the next three, etc., it will be readily seen that Model 71 Lever Numbering Machine is the ideal device for this class of work. The operator simply pulls the lever when it is desired to change to the next consecutive number.

SPECIAL MACHINES — Other styles of figures than shown will be made to order only, at an extra charge. See page 9. Suffix and Prefix letter wheels same price as Model 41.

Letter wheels may precede or follow figures. 45 represents year.

Dashes are sometimes used to separate columns making figures easier to read.

Symbols may precede or follow figures.

Word wheels may precede or follow figures.

Word wheels may be placed in center of figure wheels.

Two sized figures are sometimes used in same machine.

Gothic outline figures made in several sizes.

Gothic figures with each number spelled out underneath.

Intaglio figures made in several sizes.

Combined numbering and dating machine.

Numbering Machines are made in almost countless varieties and special machines designed to suit almost any requirement. If machines here shown do not cover your particular work, write for prices, giving details. To facilitate manufacturing, most of the figures here shown may be obtained in any one of three (3) widths of frames. The height of the machine is the same in all cases. In the case of very small figures, "visible feature" is omitted, being too small to read. With some of the larger sized figures, "visible feature" is omitted for lack of space. Only five (5) figure wheels are automatic in any of the machines here shown. Drop ciphers are furnished in all wheels except unit and last wheels. Special Models 110 and 111 take Model 41 prices.
